# Energy performance certificate (EPC)

508, Worsley Road Eccles	Energy rating	Valid until:	11 October 2027
MANCHESTER M30 8JT		Certificate number:	9028-0967-6290-5013-7910
Proporty type			

## Property type

Semi-detached house

## Total floor area

88 square metres

#### Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

#### Energy efficiency rating for this property

This property's current energy rating is D. It has the potential to be B.

See how to improve this property's energy performance.

Score	Energy rating	Current	Potential
92+	Α		
81-91	B		85   B
69-80	С		
55-68	D	64   D	
39-54	E		
21-38	F		
1-20	G		

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

#### Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 200 mm loft insulation	Good
Window	Fully double glazed	Average

Energy performance certificate (EPC) – Find an energy certificate – GOV.UK

Feature	Description	Rating
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in 78% of fixed outlets	Very good
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

# Primary energy use

The primary energy use for this property per year is 245 kilowatt hours per square metre (kWh/m2).

What is primary energy use?

# Additional information

Additional information about this property:

- · Cavity fill is recommended
- Dwelling may have narrow cavities

#### Environmental impact of this property

This property's current environmental impact rating is D. It has the potential to be B.

Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.

Properties with an A rating produce less CO2 than G rated properties.

## An average household produces

6 tonnes of CO2

## This property produces

3.8 tonnes of CO2

## This property's potential production

1.6 tonnes of CO2

By making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 2.2 tonnes per year. This will help to protect the environment.

Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

## Improve this property's energy rating

Follow these steps to improve the energy rating and score.

Do I need to follow these steps in order?

# Step 1: Cavity wall insulation

Typical installation cost	
	£500 - £1,500
Typical yearly saving	
	£180
Potential rating after completing step 1	
	71   C
Step 2: Floor insulation (suspended floor)	
Typical installation cost	
	£800 - £1,200
Typical yearly saving	
	£38
Potential rating after completing steps 1 and 2	
	73   C
Step 3: Low energy lighting	
Typical installation cost	
	£10
Typical yearly saving	
	£13

## Potential rating after completing steps 1 to 3

	73   C
Step 4: Solar water heating	
Typical installation cost	
£4,	,000 - £6,000
Typical yearly saving	C.).
	£29
Potential rating after completing steps 1 to 4	
	74   C
Step 5: Solar photovoltaic panels, 2.5 kWp	
Typical installation cost	
£5,	,000 - £8,000
Typical yearly saving	
	£269
Potential rating after completing steps 1 to 5	
	85   B
Paying for energy improvements	
You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-sch</u> help you buy a more efficient, low carbon heating system for this property.	<u>eme)</u> . This will
Estimated energy use and potential savings	
Based on average energy costs when this EPC was created:	
Estimated yearly energy cost for this property	£857
Potential saving if you complete every step in order	

£261

Energy performance certificate (EPC) – Find an energy certificate – GOV.UK

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

# Heating use in this property

Heating a property usually makes up the majority of energy costs.

Estimated energy used to heat this property		
Type of heating	Estimated energy used	
Space heating	12335 kWh per year	
Water heating	2119 kWh per year	
Potential energy savings by installing insulation		
Type of insulation	Amount of energy saved	

Cavity wall insulation

3956 kWh per year

# Saving energy in this property

#### Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
